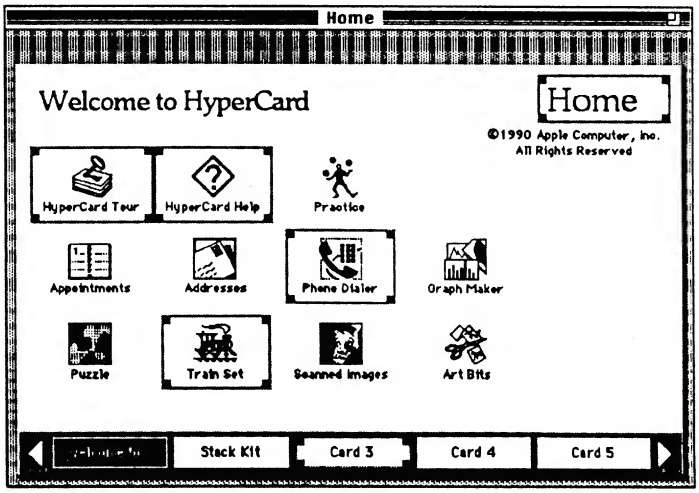
The Field & Button Tool HyperCard Left Out

With INside 2.0™ you can now select & work with groups of buttons and fields, from within HyperCard™. Instantly drag, align, or set the properties of an entire group of objects.

It's as easy as 1-2-3!



1 - Type 'INSIDE'

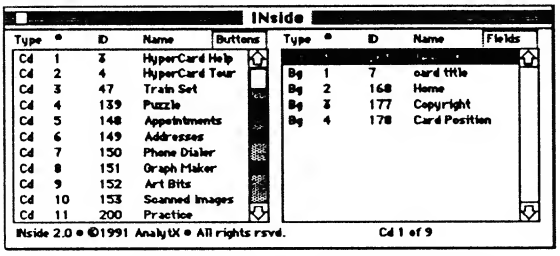
INside is always available to you from within HyperCard. Just type 'INside' into the message box.

2 - Click on Fields or Buttons

All you have to do to work with a group of objects is to click on them to select them.

3 - Change the Objects

You now have full control over your grouped objects. You can **drag them** to a new location, **align them**, or globally **change any of their properties**. All with the click of a mouse.



INside has no complex scripts to learn. It is completely integrated with the HyperCard 2.0 working environment. Just install it once, and it is always just a keystroke away. INside even gives you access to objects that are hidden, invisible, or moved off of a card!

INside 2.0

At only $99 INside 2.0 will be the best bargain in your HyperCard toolbox. Contact your local software dealer or AnalytX directly for more information or a demonstration.
